Your Review:

Hello. I really like the book One for the Murphy's. I hope that when someone picks this book up their whole mind changes about judging others without knowing what its like to walk a mile in their shoes. Also, a whole new perspective on foster families and how your treated when placed in one. There's just as much good in the world as there is bad. Its all up to you and what you make of it. I recommend this book to everyone.. young and old.
