A wordless picture book? Not everyone is skilled at improv, so how do you read without words?

According to [Reading Rockets](#)—a wonderful national public media literacy initiative offering information and resources on how young kids learn to read, why so many struggle, and how caring adults can help—sharing wordless books is a terrific way to build important literacy skills. This includes listening skills, vocabulary, comprehension, and increased awareness of how stories are structured. [Read more about Wordless Picture Books](#)

Brood X, the Great Eastern Brood of cicadas, has made the summer of 2021 a very loud and interesting season in Indiana. Dogs and birds alike have loved these natural protein snacks, but there is more to these weird insects than meets the eye (or ear).

According to National Geographic Kids, there are over 3,000 species of cicadas (Shaw, 2021). These 3,000 species are divided into 2 distinct groupings: annual and perennial. Only 7 species of cicadas fall into the perennial category, meaning they emerge en masse like Brood X (Shaw, 2021). [Read more about Brood X](#)

[Early Literacy Skills and 1,000 Books Before Kindergarten](#)

Babies and toddlers are like little sponges, hungrily soaking up everything around them. Curiosity to understand, explore, observe, and taste everything around them is crucial to early brain development. These natural instincts sometimes lead to exciting and embarrassing stories to tell at their high school graduation. These little people are constantly observing, listening, and emulating the world around them, especially their caregivers. You are babies' and toddlers' first (and most important!) teachers!
