

Music CD

Proper care and feeding of your DVDs, CDs and BluRays.

When compact discs first came out they were proclaimed to be almost indestructible. I still remember watching the Today Show and being amazed as the new media storage for music was demonstrated. Part of the demonstration was taking a small hammer and hitting the CD disc with it. A wonder of wonders; the disc still played. Looking back on this event today I wonder if the disc would have played all the way through. The Idea that digital disc storage was indestructible has been more than a little overblown. Digital discs need the same care and sometimes greater care than the old vinyl recordings. I would like to share with you some guidelines for caring for your digital discs. " [Read more](#)
