

# Somewhere In Time

[view in catalog](#)

Love knows no reason, no boundaries, no distance. It has a sole intention of bringing people together to a time called forever.

-- Unknown

Perhaps the quote above was in the mind of Richard Matheson, the author of the book *Somewhere in Time*? or in the thoughts of the writers of the screenplay for the film; perhaps not. It could easily be applied to this story of Playwright Richard Collier (Christopher Reeve) and Actress Elise McKenna (Jane Seymour) and the love that lasted both their lives. The difficult question posed by the story is understanding just when their love began? Did it begin at the moment Richard first saw her, after the 1972 opening performance of his play when she presses a watch into his hands; or when Elise first meets him at the elegant hotel where he eventually returns the watch to her sixty years earlier? Theirs is truly a love that transcends time itself. [Read more](#)

# If You Liked Doctor Who

[Doctor Who](#) or type up... In November a show which is perhaps the longest running television series in the history of Television celebrates 50 years. The show is BBC One's time traveling adventure *Doctor Who*. "Who" is more of a question than a name. Launched 1963 with William Hartnell as "The Doctor" a Time Lord from Gallifrey who travels in time and space in a ship known as The T.A.R.D.I.S; a ship inexplicably larger on the inside than the outside and which looks exactly like a 1960's British police call box.
