This book is a sequel to Twilight. I think that this is the worst book of the series. The leading man

Edward is hardly in the book. So if you like hearing about Edward than you wouldn't like this book. It gets really repetitive and gets old really fast until Edward comes back

Similar authors or titles?:

Twilight, Eclipse, Breaking Dawn

Would you recommend this book?:

Maybe, if you don't like not hearing about Edward then I would not recommend this book. It gets really old and repetitive son I actually would not recommend this book at all, but you kind of have to read because it is only the second book in the four book series of the twilight saga

The sequel to Twilight is even better than the first one. While there are a few slow parts, hold on.
