

[Wireless Printing](#)

Choose the appropriate link below to download and install the wireless printing software you will need to access wireless printing at the Library. Wireless printing is only available at the Downtown Library and Ellettsville Branch.

[Windows](#) or [Mac/Apple](#)

After the installation is complete, the temporary wireless printing client will allow you to access our printers from your computer using the same payment options that are available when printing from our public computers. You may print using either your library card number and password or a guest pass number and guest password.

When you are finished printing and shut down your computer, the print client application will disappear.

Note: To close the Mac Print Client, select "Quit LPT One Mobile Print Client" from the LPT One Mobile Print Client menu.
