Exploding stars and invisible planets - the science of what's out there	 <p>"In Exploding Stars and Invisible Planets, Fred Watson, an award-winning astronomer, presents the most up-to-date knowledge on hot topics in astronomy and space science, providing a fascinating and entertaining account of the latest research. Watson explains how to find invisible planets around other stars, why dark matter matters, and the future of citizen space travel, all while recounting the seismic shifts in understanding that have taken place during his illustrious forty-year career"--</p>	Jan 14, 2020

Father of lions - one man's remarkable quest to save the Mosul Zoo

"After two and a half years of ISIS occupation, and months of fighting between the militants and government forces, the Mosul Zoo was one of the few outdoor attractions still standing in Iraq's second city, its inhabitants kept alive by Abu Laith, a square-set 50-something mechanic and passionate animal lover. As the animals began to starve under the siege by advancing Iraqi army forces, Abu Laith, the "Father of Lions" and his prote´ge´es and family risked their lives to keep the animals alive.

How to build a dragon or die trying - a satirical look at cutting-edge science

"What if you could have your own real dragon? While that might seem like just a fantasy, today cutting-edge science has brought us to the point where it might really be possible. This book looks into the possibilities of making living, fire-breathing dragons. The world has been fascinated with dragons for thousands of years. Fictional dragons still have a firm place in pop culture, such as Smaug from The Hobbit as well as the dragons in Game of Thrones and in the How to Train Your Dragon movies.

Pollinator victory garden - win the war on pollinator decline with ecological gardening - how to attract and support bees, beetles, butterflies, bats, and other pollinators

"The passion and urgency that inspired WWI and WWII Victory Gardens is needed today to meet another threat to our food supply and our environment-the steep decline of pollinators. The Pollinator Victory Garden offers practical solutions for winning the war against the demise of these beneficial animals. Pollinators are critical to our food supply and responsible for the pollination of the vast majority of all flowering plants on our planet. Pollinators include not just bees, but many different typ

Saturn

Saturn is the showpiece planet of our solar system. It may not be the largest, nor the smallest, nor even the only planet with rings. But it is among the most stunning objects in the sky and is always breathtaking when seen in a telescope. This is a beautifully illustrated, authoritative overview of the entire history of humankind's fascination with the ringed planet, from the first low-resolution views by Galileo, Huygens, and other early observers with telescopes to the most recent discoveries

To see every bird on earth - a father, a son, and a lifelong obsession

When the author's father Richard was 11 years old, he spotted a Brown Thrasher, and his fascination with birds began. Now a "Big Lister," Richard is one of only 10 or so people to have recorded more than 7,000 species in his notebook. This is the remarkable chronicle of his travels across the globe in pursuit of his fixation. It is also a thoughtful examination of the natural world and a touching father/son story.
