

Seed Library

 Image not found or type unknown

The Seed Library is a collection of non-invasive, non-GMO food and flower seeds that you can take to plant at home. Some seeds are organic, some are heirloom, and some are pollinator-friendly. Seeds are available in The Commons at the Main Library. Please take only what you plan to use. Record your seed growing progress using these seed logs:

- [Seed Log for Adults](#)
- [Seed Log for Kids](#)

The Seed Library was created with the support of The George E. Archer Foundation.
